

PRINT MEDIA

As a service to our growing network of value-added dealers, Mark Bric is pleased to introduce a limited line of select print media under the brand of Mark Bric PerfectPrint. Recognizing that even the best display product is only as good as the quality of the printed graphic, Mark Bric has begun assembling a select line of proven media, choices that bring an extra measure of reliability and quality to the finished product. From this small beginning, we hope to expand this offering based on the market response. We invite you to begin using the PerfectPrint product that best suits your needs, and we ask for your suggestions on other types of media that you would like to see included in this new line. With the Mark Bric name comes the Mark Bric guarantee of quality and dependability that you've grown to trust.

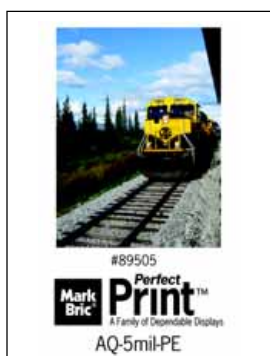

AQ-Stoplight-7mil-PE A premiere lay-flat polyester film with co-extruded opaque backer. Microporous, high-gloss instant dry coating is perfect for HP and most other water-based inks (dye & pigment).

Item No.	Width	Length
89500-360	36"	100 ft.
89500-500	50"	100 ft.
89500-600	60"	100 ft.

24" x 10' sample roll available

Suggested Uses	
BannerUp, BannerUp Lite	+3-5 mil polyester overlamine
MultiMaster, Impression	+3-5 mil polyester overlamine
SnapUp center panels	+10-20 mil polycarbonate overlamine
SnapUp end panels	+5-10 mil polycarbonate overlamine

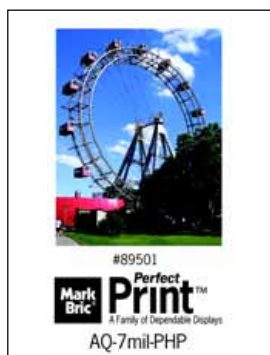

AQ-5 mil-PE Exactly the same film as above, without the stoplight backer. This lower priced film has the same instant dry coating that works perfectly with most water-based inks (dye & pigment). The 5 mil polyester is a great film for 3-ply "sandwich" construction or for simple low-cost banners and posters where you prefer the durability and tear resistance of polyester. NOTE: absence of the stoplight backer means that this film is more subject to edge curling.

Item No.	Width	Length
89505-360	36"	100 ft.

24" x 10' sample roll available

Suggested Uses	
BannerUp Lite	+3-7 mil polyester overlamine
MultiMaster, Impression	+3-7 mil polyester overlamine
EGO panels	+15 mil vinyl backer and 10 mil polycarbonate overlamine

AQ-7mil-PHP This outstanding photo-matte paper delivers great results on most water-based ink jet printers (dye & pigment). It offers a good low-cost alternative as the print media for 3 ply construction or for simple, low cost banners and posters where there is no particular need for the tear resistance of film.

Item No.	Width	Length
89501-360	36"	100 ft.

24" x 10' sample roll available

Suggested Uses	
SnapUp center panels	+5-7 mil vinyl backer and 10-20 mil polycarbonate overlamine
SnapUp end panels	+5-7 mil vinyl backer and 5-10 mil polycarbonate overlamine
EGO panels	+15 mil vinyl backer and 10 mil polycarbonate overlamine
BannerRail, Posters, Poster Stands	Use with or without lamination

Sol-D/S Stoplight-14mil-VNL This double sided vinyl film makes a perfect choice for most of today's solvent printers. The printing faces are built around an opaque, lay-flat center panel to assure that your banners do not exhibit edge curl and are free of undesirable backlighting. Lamination is optional.

Item No.	Width	Length
89506-390	39"	99ft.

39" x 15' sample roll available

Suggested Uses	
All banner stands, SnapLock BannerRail	Use with or without lamination, single or double-sided printing
