

Mark Bric[®] **BANNER RAIL**[™]
A Family of Dependable Displays

Three styles of Banner Rails provide simple, classy, and cost effective solutions for displaying your graphics.

Plastic Slide-in

Aluminum Snap-Lock

Aluminum Slide-in

All three styles of Mark Bric BannerRail™ share many convenient features, including:

- Available in bulk for even better value and easy stocking
- Recommended for use at both top and bottom of posters for maximum impact
- May be suspended one from the other in daisy-chain fashion
- Easily mounted with optional accessories such as ceiling grid clips, C-hooks, suction cups, and jack chain

Banner Rail in Aluminum

Our aluminum banner rail is now available in two distinct models—our original snap-lock design and our new slide-in model. Both models are provided in a classy clear-coat anodized finish, and both are fitted with end-caps and hanging eyelets in black plastic for a professional, functional finishing touch.

Snap-Lock Features

- Unbroken lengths up to 90"
- Grip range from 1 thickness of paper up to 0.016"-16 points
- Perfect for thin materials such as banners and posters

Slide-in Features

- Unbroken lengths up to 96"—a full 8 ft!
- Grip range and style for heavy-duty substrates—up to 3/32 (0.093)"-93 points
- Perfect for heavier materials such as poster boards, foam boards and Sintra (pvc) panels
- Comes complete with grommets for securing the panels
- A matched hand-held hole punch is an available accessory

Create unlimited lengths in either style with our new splicing connector.

Banner Rail in Plastic

Our black plastic banner rail is the best low-budget solution that we have found for displaying signs and posters in a tasteful and professional manner. Fitted with end-caps and hanging eyelets in black plastic, this is just about as simple and low-cost as it gets!

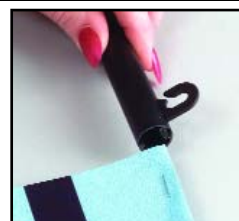

Features

- Simple slide-in design
- Unbroken lengths up to 90"
- Grip range from 1 thickness of paper up to 1/16 (0.062)"— 62 points
